

VAMPIRE

Written by

Chris Zell

EXT. PARK - DAY

A WOMAN is slowly and lethargically walking through the park.

MALE (V.O.)
Are you finding that the simplest
tasks are too much for you? Things
you once enjoyed like trees and
children frolicking no longer bring
you glee? Has your daily existence
become a struggle?

The Woman stops and nods into the camera.

MALE (V.O.)
Then have you thought of Vampire?

A VAMPIRE steps from around a tree and puts his hands on the
woman's shoulder.

MALE (V.O.)
Vampire is the quick and easy way
to put the vim and vigor back into
your life.

The Vampire spins the woman around in a dance move. The Woman
enjoys it.

MALE (V.O.)
After one dose of Vampire you'll
find that you're life will never be
the same again.

The Woman is happy, takes the Vampire's hand and they start
to exit the park.

MALE (V.O.)
Vampire is not for everyone. If you
have low blood sugar or high blood
sugar Vampire may not be right for
you. If you have iron poor blood or
iron enriched blood Vampire may not
be right for you. Consult your
physician before taking Vampire.

The VO speeds up as we continue to follow the Vampire and
Woman out of the park.

MALE (V.O.)

Vampire contains some side effects such as, a extended life of monotony, pain and redness in the injection location, you should stay out of the sun while on Vampire because contact may cause redness, blistering, open sores, peeling skin, oozing, smoldering and death.

(pause)

People taking Vampire have been known to crave blood, avoid direct sunlight, maintain a pallor year round and a night time circadian rhythm.

(pause)

Many people on Vampire find the ability to fly. While this is not a side effect everyone experiences it does require a full body transformation into a bat. Interspecies transformative interaction is not for everyone so consult with your doctor before attempting.

(pause)

Vampire. A new you today.

(pause)

And forever.

The Vampire and Woman fade from the scene as we

FADE TO BLACK.
